

Technical Product Bulletin

DISH MATE LT

DISH MATE LT is an alkaline liquid automatic dish machine product for hard water applications. This formula features controlled foaming characteristics for low-temperature dish machines. In addition, this product is instantly soluble, delivers excellent hardness sequestration at economical costs, and provides effective one-step cleaning with high-quality surfactants.

Directions

Remove general soil with a dosage of 1/4–1/2 ounce of DISH MATE LT per gallon of wash tank water capacity. This product is effective at wash tank temperatures between 140–150°F. Lower temperatures will increase product usage. Consult your Pariser representative for specific usage directions as dosages will vary based on local water conditions.

DISH MATE LT is also recommended for use in glass-washing machines. A conductivity probe installed in the wash tank controls general usage. Do not use the product on aluminum or soft metals.

Handling

DISH MATE LT is alkaline. Care should be taken not to wash aluminum products in machines using this product. Avoid contact with skin, eyes, or clothing. Avoid breathing concentrated fumes. In case of contact with skin or eyes, flush with excessive amounts of water. For eyes, continue flushing with water for at least 15 minutes and get medical attention.

Packaging

DISH MATE LT is available in 4x1-gallon cases and 5-gallon pails.
