HYDRO-POWER™

DESCRIPTION

HYRDO-POWER is an environmentally friendly, rapidly biodegradable, effective and highly concentrated, non-ammoniated Multi-Purpose cleaner, which can also be used on a broad spectrum of applications to include painted surfaces, formica tables, stainless steel, tiled walls, fixtures and appliances, bathroom ceramic tiles and fixtures, glass and mirrors.

The product contains ecology sensitive detergents and the sanitizing and safe-oxidizing benefits of Hydrogen Peroxide. In its diluted state, product is highly economical, fast acting, and an excellent tub and tile cleaner.

HYRDO-POWER leaves glass surfaces dust-free and cleaner longer. The product leaves no streaks or dust-catching film.

Product meets the EPA criterion 3.4.3 for cleaners in the Green Seal Environmental Standard for Lodging Properties (GS-33).

DIRECTIONS

HYDRO-POWER may be dispensed through spray bottles diluting the product with water at a 12 - 20 to 1 mixture depending on the water quality being used for dilution. It is also effective on heavy soil used at a 8-10 to 1 ratio. For kitchen and housekeeping usage, product should be proportionally dispensed through automatic feeders or from a hand pump to control usage. Use a lint-free cotton cloth or paper towel to avoid streaking.

HANDLING

HYDRO-POWER should not be taken internally. If ingested, contact a physician immediately. Skin and Eyes, if contacted, should be rinsed for not less than 15 - 20 minutes, and again a physician should be contacted if irritation persists. Store above 32°F.

PACKAGING

HYDRO-POWER is available in 4 x 1 gallon case, and 5 gallon pails. Gallon containers are outfitted with the Saf-T-Flo inserts which in combination with the Pariser Closed Loop Docking Station, prevent product from contamination or spillage issues.
