

Technical Product Bulletin

HI-TIDE

HI-TIDE is an environmentally friendly, concentrated all-purpose laundry detergent designed for use on an extraordinary range of applications. HI-TIDE is non-hazardous, non-toxic, and readily biodegradable. This product does not contain phosphates, NTA, or alkylphenol ethoxylate (APE). It meets or exceeds the EPA criterion for cleaning products in the Green Seal Environmental Standard 3.4.3 (GS-33). HI-TIDE has been certified by the EPA's Safer Choice program as an environmentally-preferred laundry product.

Performance

HI-TIDE is a unique detergent developed for washing durable press, polyesters, poly-cotton blends, and other hard-to-clean fabrics. Together with our eco-friendly alkaline builders and brighteners, the product will remove greasy soils without affecting stain resistance or fabric crease.

Directions

HI-TIDE is a concentrate and should be used with a Pariser-provided liquid-feed injection system or dosed according to usage directions recommended by your Pariser representative. Generally, 2–3 ounces of the product are utilized per 100 pounds of wash in light soil applications and 4–5 ounces per 100 pounds on heavy soil are sufficient in the break-operation.

Handling

Standard caution should be used to prevent product contact with eyes or children.

Packaging

HI-TIDE is packaged in recyclable 4x1-gallon cases, 5-gallon pails, and 15- and 55-gallon drums.
