MARVELOSO

Description

MARVELOSO™ is a rapidly biodegradable, highly-concentrated, non-ammoniated all-purpose cleaner which can be used on Formica, stainless steel, tiled walls, fixtures, appliances, fiberglass, and authentic wood surfaces. The fast-acting versatile cleaner is economical when diluted.

MARVELOSO leaves no streaks or dust-catching film, and often will not require extra rinse steps. The product contains a lavender fragrance.

Directions

MARVELOSO is diluted with 64 parts water to 1 part product (depending on the water quality) and dispensed using spray bottles. At a 32:1 ratio, it is effective on heavy soil. For kitchen and housekeeping usage, the product should be proportionally dispensed through automatic feeders or from a hand pump to control usage. Utilize a lint-free cotton cloth or paper towel to avoid streaking.

Handling

MARVELOSO should not be taken internally. If ingested, contact a physician immediately. Product is safe on hands and skin; however, rinse thoroughly if prolonged contact to skin occurs. If in contact with eyes, rinse for 15–20 minutes, and contact a physician if irritation persists. Store above 32°F.

Packaging

MARVELOSO is available in 4x1-gallon cases and 5-gallon pails.
