

## Technical Product Bulletin

### MARVELOSO

MARVELOSO™ is a rapidly biodegradable, highly-concentrated, non-ammoniated all-purpose cleaner for Formica, stainless steel, tiled walls, fixtures, appliances, fiberglass, and authentic wood surfaces. The fast-acting, versatile cleaner is economical when diluted. MARVELOSO leaves no streaks or dust-catching film and often will not require extra rinse steps. In addition, the product contains a lavender fragrance.

#### Directions

MARVELOSO is diluted with 64 parts water to 1 part product (depending on the water quality) and dispensed using spray bottles. At a 32:1 ratio, it is effective on heavy soil. For kitchen and housekeeping usage, proportionally dispense the product through automatic feeders or from a hand pump to control the usage. Utilize a lint-free cotton cloth or paper towel to avoid streaking.

#### Handling

MARVELOSO should not be taken internally. If ingested, contact a physician immediately. The product is safe on hands and skin; however, rinse thoroughly if prolonged contact with skin occurs. If in contact with eyes, rinse for 15–20 minutes, and contact a physician if irritation persists. Store above 32°F.

#### Packaging

MARVELOSO is available in 4x1-gallon cases and 5-gallon pails.
