

Technical Product Bulletin

CEXP

CEXP is an innovative, highly active, water-side odor-counteractant effective for numerous applications involving the removal of organic-type odors. It uses state-of-the-art molecular encapsulation technology to mitigate odors of various types such as those related to bodily excretions, feather and down, and smoke-related sources.

Directions

Hard surfaces: Dilute CEXP at 4–6 ounces per gallon of warm water. Apply the stock solution to odor sources with a pressure sprayer, mop, or other cleaning mechanisms.

Smoke restoration of garments through wet-cleaning: Add the following to the last water operation of the wash formula:

- (8–10 minutes) at a dosage of 1 ounce per 10 pounds of goods in warm water for mildly contaminated classifications
- 2 ounces per 10 pounds for heavily impregnated textiles.

Down feather washing: Processes at 6–8 ounces per hundredweight (CWT) of washer capacity.

Packaging

CEXP is available in 4x1-gallon cases and 5-, 15-, and 55-gallon containers.
