*Pariser Industries manufactures
its products in conformance with
ISO 9001 Standard requirements.*

The Pariser Liquid Laundry Injection System (LLS) is a hands-off, maintenance-free system that streamlines your on-premise laundry operation and reduces related washroom costs.

The automated system feeds the products directly into the washing machine. It allows you to add the right chemicals in the right proportion at the right time — every time. Since liquid products dissolve instantly, there's no delay in wash action. Linen is washed consistently clean and bright. Pariser LLS offers a choice of injection systems that can feed from 1 to 8 different products depending on soil and operating conditions.

LLS saves you money by:

- **Maximizing product use:** No undissolved solid particles of cleaning products are left on your finished work or in your supply hoppers.
- **Reducing waste:** A performance-rated peristaltic pump measures the precise chemicals without mixing, measuring, or guessing.
- **Extending linen life:** Controlled proportioning eliminates excessive alkali and over-bleaching.
- **Lowering labor costs:** Minimizes washwheel supervision and frees laundry workers for other duties.
- **Increasing safety:** Less handling of chemical products means fewer spills and fewer injuries.
- **Reducing product loss:** Pariser offers a variety of product container sizes for easy handling and disposal. Larger containers reduce switching and waste. You'll need less storage area, have greater inventory control, and virtually eliminate theft.

Pariser brings unmatched industrial expertise to the on-premise laundry and prides itself on:

- Dedication to quality chemicals and service requirements.
- Products that deliver results.
- Using the latest technology to customize systems.
- State-of-the-art equipment design.
- Providing production expertise sensitive to linen and energy demands.
- The most varied and versatile liquid product line on the OPL market today.

The Pariser technical staff offers a complimentary operation analysis to recommend the most efficient and cost-effective system that:

- Improves equipment utilization.
- Reduces boiler time and operation time.
- Improves washroom procedures.
- Better manages energy and labor consumption.
- Revamps all production systems.

BOOSTER PLUS Builder for low to moderate water hardness where a heavy duty liquid alkali is needed.

BRITE-C A blend of surfactant, broad-spectrum oxygen bleach, and whitening agent that is safe on all types of fabrics, including colored garments.

CITRASOL A carefully selected blend of citrus degreasers, anionic and non-ionic biodegradable synthetic detergents, and fluorescent brighteners.

This list is a small representation of the products Pariser offers. Contact your Pariser representative or email info@pariser.net to learn more about the products that would be the most beneficial for your needs.
