

Technical Product Bulletin

ONE SHOT PLUS

ONE SHOT PLUS is the product of choice for many laundering applications requiring a liquid, built laundry detergent. This combination detergent contains several biodegradable synthetic detergents, water conditioners, and alkalinity to remove a wide range of soils found in hotels/motels and healthcare institutional facilities. The product is phosphate-free, with mild alkalinity levels compared to most built detergents on the market today, allowing break-bleaching operations on certain classifications and saving formula time and water consumption.

Performance

ONE SHOT PLUS is infinitely soluble, penetrating fabrics to loosen, emulsify, and suspend soil to prevent greying due to redeposition. The product is safe on all fabrics, but consult with a Pariser representative for proper usage rates.

Advantages

- Enhanced safety for linen and personnel.
- Used as received.
- Requires less rinsing than conventional built detergents.
- Combines alkali and surfactant requirements.
- Effective across a broad range of water hardness conditions.

Directions

Light soil: 2–4 ounces per 50 pounds of wash in the break operation at 130°–140° F.

Medium soil: 4–6 ounces per 50 pounds of wash in the break operation at 150°–160° F.

Handling

ONE SHOT PLUS contains alkaline ingredients. Use caution in handling. Do not take it internally. If liquid gets on hands or in the eyes, flush with plenty of water for 15–20 minutes. If irritation persists, get medical attention.

Packaging

ONE SHOT PLUS is available in 5- and 15-gallon containers.
