

Technical Product Bulletin

OX-OUT

OX-OUT is an economical, powdered blend of stable oxygen bleach with dispersant and water conditioners. Use OX-OUT on colored linens without degradation of color and safely on mixed classifications of white and colored goods.

Directions

Your Pariser representative will provide you with the best usage directions for your application. However, general directions are as follows:

- Applied in break operation at 4–6 ounces per 100 pounds.
- Best temperature 150°–160°F (check colorfastness of the garment to this level of water temperature).
- Safely soak colors and whites at 5–6 ounces per 100 pounds overnight.

Handling

Keep away from children. Do not mix with reducing agents (chlorine bleach) or acids. Usage in the presence of iron may cause pinholes.

Packaging

OX-OUT is available in 50- and 100-pound containers.
