

## Technical Product Bulletin

### SMART WASH

SMART WASH is a biodegradable, alkaline liquid automatic dish machine product for heavy soil applications. This formula features controlled foaming capabilities and is recommended for all types of dish machines. This product is instantly soluble, delivers excellent activity at economical costs, and provides effective one-step cleaning with high-quality surfactants.

SMART WASH has been certified by the EPA's Safer Choice program as an environmentally-preferred ware washing product.

#### Directions

General soil can be removed with the dosage of 1/4–1/2 ounce of SMART WASH per gallon of wash tank water capacity. Product is effective when used at wash tank temperatures ranging between 150°–160°F. Lower temperatures will increase product usage. Higher temperatures will cause the product to cloud up. Consult your Pariser representative for specific usage directions as dosages will vary based on local water conditions.

SMART WASH is also recommended for use in glass-washing machines. General usage is controlled by a conductivity probe installed in the wash tank. Do not use on aluminum or soft metals.

#### Handling

SMART WASH is alkaline. Care should be taken not to wash aluminum products in machines using this product. Avoid contact with skin, eyes, or clothing. Avoid breathing concentrated fumes. In case of contact with skin, flush with excessive amounts of water. In case of contact with eyes, flush with excessive amounts of water for at least 15 minutes and get medical attention.

#### Packaging

SMART WASH is available in 4x1-gallon cases, 5-gallon pails, and 55-gallon drums.
