

Technical Product Bulletin

SOUR P

SOUR P is a neutralizing laundry sour product with exceptional metal passivation properties for stainless steel. The product has a direct application where the final pH of linen needs to be below the range found in the raw water used for rinsing.

Directions

Use approximately 3–4 ounces CWT (per hundredweight) based upon the desired pH level of the processed linen.

Handling

SOUR P is an acid commonly used for souring or pH neutralization. Use extreme care when handling. The product can cause skin and eye irritation upon contact. If this occurs, rinse the area with water or a soda bicarbonate solution for 15 minutes.

Packaging

SOUR P is available in 5-, 15-, 30-, and 55-gallon containers.
