

Technical Product Bulletin

TEX-SETTE

TEX-SETTE is a highly stable thermoplastic hydrocarbon resin developed for textiles and widely used not only in dry cleaning processes but also in textile preparation. The product contains an effective brightener that enhances optical effect.

Because of its unique stability, TEX-SETTE, unlike other sizings, will not power off or cause dusting in the finishing process.

TEX-SETTE is a water white product that will not cause discoloration and provides the finest finish, or hand, as required by the textile manufacturing industry.

TEX-SETTE can be used in perchloroethylene and petroleum-based solvents. TEX-SETTE can be used as a bath injection additive or as a charge without the risk of blinding filters or clogging stills.

Directions

Apply TEX-SETTE using the dipping method.

Dip tanks: 1/2 – 3/4 gallon per 100 gallons of solvent.

Charging: Use at 0.5–0.75%.

Batch use: TEX-SETTE can also be used on a batch system basis, which is the preferred method.

Use 1 1/4 ounces for every 10 pounds of garments in the load.

Packaging

TEX-SETTE is available in 4x1-gallon cases and 5-, 15-, and 55-gallon containers.
