

Technical Product Bulletin

KEX PLUS

KEX PLUS is an alkaline liquid automatic dish machine product for heavy soil applications. This formula features controlled foaming characteristics and is usable for all dish machines. This product is instantly soluble, delivers excellent activity at economical costs, and provides effective one-step cleaning and destaining.

Directions

Remove general soil with the dosage of 1/4–1/2 ounce of KEX PLUS per gallon of wash tank water capacity. This product works well at wash tank temperatures between 150–160°F. Lower temperatures will increase product usage, while higher temperatures can cause the results to be cloudy. Consult your Pariser representative for specific usage directions, as dosages will vary based on local water conditions.

KEX PLUS is also suitable for glass-washing machines. A conductivity probe installed in the wash tank controls general usage. Do not use on aluminum or soft metals.

Handling

KEX PLUS is alkaline. Take care not to wash aluminum products in machines using this product. Avoid contact with skin, eyes, or clothing. In case of contact with skin or eyes, flush with excessive amounts of water. For eyes, continue flushing with water for at least 15 minutes and get medical attention.

Packaging

KEX PLUS is available in 4x1-gallon cases and 2.5- and 5-gallon containers.
