FABRI-SOFT

Product Code #4

DESCRIPTION

FABRI-SOFT is a highly active, multifunctional fabric softener and neutralizing agent for use on all types of fabrics.

PERFORMANCE

FABRI-SOFT contains a unique surface active agent possessing properties that overcome harshness in fabric that may be characteristic of the fabric itself or the result of the laundering process. Ingredients in this fabric softener include cationic compounds such as the imidazoline and quaternary ammonium products. These cationic surfactants ionize in solution yielding positively charged ions. Cellulosic fibers, such as cotton, have a negative electrical charge when wet and consequently, attract and hold the positively charged ions to their surface. Additionally, fabric pH is lowered through use of **FABRI-SOFT** preventing grey-down due to alkali carryover and residuals.

BENEFITS OBTAINED FROM THE USE OF FABRI-SOFT

- Reduces excessive wrinkling.
- Shortens extraction time.
- Reduces drying time, conserves energy.
- Makes shake-out and pressing easier.
- Makes pulling loads easier.
- Imparts fluffiness to treated fabric.
- Fed directly from easy to store and handle 2.5 gallon totes.
- Helps prolong life of fabrics.
- Reduces static.
- Helps avoid sticking washer doors.
- Reduces and helps to control lint.
- Articles ironed or pressed have smoother finishes.
- Improves "hand" and "luster" of treated textiles.

DIRECTIONS

Apply **FABRI-SOFT** as received to the final wash operation at the rate of 1 oz. per 50 lb. of wash in cold or split temperature water.
